## 1. Introduction

The wireframe document for the Book Recommendation System outlines the layout and design of key user interface components of the platform. These wireframes provide a visual representation of the application's screens and navigation flow, serving as a blueprint for the development team to implement the user interface.

## 2. User Interface Components

### 2.1 Landing Page

The landing page is the entry point to the Book Recommendation System and provides users with an overview of the platform's features and benefits. It includes a search bar, featured books, and call-to-action buttons for user registration or login.

## **2.2 User Registration/Login**

The user registration/login page allows new users to create an account or existing users to log in to their accounts. It includes input fields for username, email, password, and options for social login (if available).

## **2.3 User Profile**

The user profile page displays information about the user, such as their name, email, profile picture, and preferences. It also includes options to edit profile settings and view past interactions with the platform.

## **2.4 Book Discovery**

The book discovery page enables users to explore and discover new books based on their interests and preferences. It includes filters for genre, author, rating, and other criteria, as well as search functionality.

## **2.5 Book Details**

The book details page provides users with comprehensive information about a specific book, including its title, author, cover image, description, ratings, reviews, and related recommendations.

## **2.6 Recommendations Page**

The recommendations page presents personalized book recommendations to users based on their profile, reading history, and preferences. It includes a curated list of recommended books with options to add to favorites or purchase.

# **3. Navigation Flow**

The navigation flow of the Book Recommendation System follows a logical sequence of actions that users can take within the platform. It includes transitions between the landing page, registration/login, user profile, book discovery, book details, and recommendations pages.

# **4. Mockups**

## **4.1 Landing Page**

## **4.2 Registration/Login Page**

## **4.3 User Profile Page**

## **4.4 Book Discovery Page**

## **4.5 Book Details Page**

## **4.6 Recommendations Page**

# **5. Conclusion**

The wireframes presented in this document provide a visual representation of the user interface components and navigation flow of the Book Recommendation System. These wireframes serve as a guide for the development team to implement the platform's user interface, ensuring a consistent and intuitive user experience.
